MEMORANDUM FOR DIRECTOR, ADMINISTRATION AND MANAGEMENT

SUBJECT: OASD (NII) / DoD CIO Reorganization and Realignment

Over the past two months as the new ASD, I have conducted a review of the staffing and organizational structure of the Office of the Assistant Secretary of Defense for Networks and Information Integration (NII) / DoD Chief Information Officer (CIO) with a focus on the missions and functions as reflected in our charter - DoDD 5144.1. To accomplish the increasingly complex missions of OASD (NII) / DoD CIO, some realignment of Directorates and the reassignment of some SES personnel are necessary. This reorganization proposal also includes the abolishment of one Deputy Assistant Secretary of Defense and the creation of the Deputy Assistant Secretary of Defense for Information and Network Assurance (DASD, INA) because of the increased emphasis in the Department on Information Assurance (IA) and network security. It also creates a second Principal Deputy, Assistant Secretary of Defense under the CIO role as discussed recently with Secretary Rumsfeld.

Attached at Tab A is the current organizational outline of OASD (NII) / DoD CIO and at Tab B, an updated outline incorporating these changes. Reassignment of affected personnel is being handled separately. Specific changes are as follows:

- **OASD (NII) / DoD CIO Front Office:**
  - Establish a Principal Deputy, DoD Chief Information Officer (PDCIO) to directly support the ASD (NII) / DoD CIO in parallel to the current Principal Deputy, Assistant Secretary of Defense (NII) [PDASD(NII)].
  - Officially appoint Ms. Priscilla Guthrie to this position as the Principal Deputy, DoD Chief Information Officer (**Draft Position Description is attached at Tab C**).
  
- **DASD Deputy Chief Information Officer (DASD, DCIO):**
  - Rename the Deputy Assistant Secretary of Defense, Deputy Chief Information Officer (DASD, DCIO) to the Deputy Assistant Secretary of Defense for Information Management and Technology (DASD, IM&T).
  - Ms. Priscilla Guthrie will be dual-hatted and will remain the DASD, IM&T.
  - Establish a Directorate for Information Sharing/Access (an SES position) under the DASD, IM&T. The billet and resource will be provided internally.

- Rename the following Directorates:
  - Directorate for Information Management to the Directorate for Information Policy.
  - Directorate for Commercial Policies and Oversight to the Directorate for Commercial IT Policy
  - Directorate for Planning, Policy, and Integration to the Directorate for CIO Management
- Abolish the Directorate for Information Assurance (becomes framework for creation of DASD, Information and Network Assurance– see below).
- Remaining Directorate unchanged.
  
- **DASD Information and Network Assurance:**
  - Establish a Deputy Assistant Secretary of Defense for Information and Network Assurance (DASD, INA) from the billets and resources currently in the DASD, DCIO Directorate for Information Assurance.
  - Establish the following Directorates under the DASD, INA:
    - Directorate for Information Assurance Policy.
    - Directorate for Defense Information Assurance Program.
  
- **DASD C3 Policies & Programs & Space Programs:**
  - Rename the Deputy Assistant Secretary of Defense for Command, Control and Communications Policies and Programs and Space Programs (DASD, C3P&P&SP) to Deputy Assistant Secretary of Defense for Command, Control, Communications, Space and Spectrum (DASD, C3S2).
  - Officially appoint Dr. Ronald Jost as the DASD, C3S2. He is currently the Acting DASD, C3P&P&SP, and also serves as the Principal Director, DASD, C3P&P&SP and the Director, Wireless and Communications Policy (**Draft Position Description is attached at Tab D**).
  - Realign the Spectrum Management Directorate from DASD (Spectrum and Support) to the DASD, C3S2.
  - Establish an Intergovernmental Personnel Agreement (IPA) with a viable candidate to serve as the Principal Director to the DASD, C3S2.
  - Abolish the Directorate for Strategy & Operations Integration and the Directorate for Wireless and Communications Policy.
  - Rename the Directorate for Communications Programs to the Directorate for Communications.
  - All other Directorates unchanged.

**DASD Spectrum and Support:**

- Abolish the Deputy Assistant Secretary of Defense for Spectrum and Support (DASD, S2).
- Realign the Directorate for Spectrum Management to the new DASD, C3S2 as outlined above.
- Rename the Directorate for Contingency Support and Migration Planning to the Directorate for Stability and Reconstruction Support, and realign the Directorate as an OASD (NII) / DoD CIO Director with direct report to the ASD (NII) / DoD CIO.

• **DASD Resources:**

- Abolish the Principal Director position.
- All Directorates unchanged.

• **Establish the Deputy to the ASD (NII) / DoD CIO for Enterprise-Wide Systems Engineering.**

- Realign the Senior Systems Engineer to the position of Deputy to the ASD (NII) / DoD CIO for Enterprise-Wide Systems Engineering. A staff of four (1 SES, 2 GS-15s, 1 GS-12) will support the Deputy to the ASD (NII) / DoD CIO for Enterprise-Wide Systems Engineering. The billets will be realigned from within NII.

• **Rename the International Affairs Directorate as the International Coordination Directorate.**

Request your review and concurrence regarding this proposal. I appreciate your continued support and assistance. Your staff may contact Ms. Sheila Talley, OASD (NII) / DoD CIO Director of Administration and Management at 614-9191 with any questions.

John G. Grimes

Attachment  
As stated

# Networks and Information Integration Chief Information Officer

## OASD(NII)/DoD CIO

Senior Systems Engineer  
Mike Kern
