2013

SUPPLEMENT to the
CONGRESSIONAL REPORT on
DEFENSE BUSINESS OPERATIONS

Table of Contents

Introduction

FY 2013 established a baseline for "covered DBS" defined in the NDAA 2012 10 U.S.C. §2222 as all defense business systems (DBS) anticipated to cost over $1 million over the period of the Future Years Defense Program (FYDP), regardless of appropriation.

In FY 2012, the IRB/DBC approved approximately 1,200 requests totaling over $7B dollars across eight functional areas for FY 2013 funding certification. The table below identifies the number of systems approved and disapproved for these certifications.

Additionally, further information pertaining to the certification is captured in the FY 2013 ETP. The ETP identified the desired set of business and IT capabilities required to transition from the current state to the target Defense Business Systems (DBS) computing environment within a specified timeframe, including certifications of covered DBS. The ETP is assembled as an output of the Defense Business Council (DBC)/Investment Review Board's annual review of OEPs.
