## Congressional Report
## on Defense Business Operations

# 2015 Congressional Report on Defense Business Operations Supplement

# Table of Contents

# Introduction

As defined in title 10 United States Code § 2222, a "covered" defense business system is anticipated to cost over $1 Million (M) over the period of the Future Years Defense Program, regardless of appropriation type. This supplement provides the following system data tables with certification results for these systems:

- Fiscal Year (FY) 2015 Certification Results - identifies the FY 2015 primary cycle system certification requests and approvals. The DBC approved certification requests totaling approximately $6.9M for 1,182 defense business systems. Some certification result financial data is controlled unclassified information, and it has not been included in the report, as indicated with "FOUO" as "For Official Use Only. Generally any conditions applied are subsequently resolved by the component, such as obtaining the subsequent approval of a problem statement, which resulted in a condition for the obligation of development and modernization (DM) funds. Conditions are tracked and managed separately by the component and monitored by the office of the Deputy Chief Management Officer.

- FY 2014 Out of Cycle Certification Results – This is an update to the primary cycle certification supplement provided in the FY 2014 Congressional Report on Defense Business Operations. It includes certification results for out of cycle requests. For FY 2014, the Defense Business Council (DBC) approved primary and out of cycle certification requests totaling $7,360M for 1,258 DBS. FY 2014 out of cycle process also allowed redistributions and reductions of previously certified amounts. Title 10 subsection 2222(i) requires reporting specific actions on the defense business system programs submitted for certification, however each redistribution did not constitute a program action "submitted for certification" action and hence are not individually reported in the supplement.

- FY 2013, the Defense Business Council (DBC) reviewed primary and out-of-cycle certification requests totaling $7,921M for 1,272 DBS and approved $7,611M for 1,259 DBS.

- Archived Systems – identifies the 301 defense business systems, "covered" and not "covered", which were retired during FY 2014.

## System Data Tables – FY 2015 Certification Results

| Certification Owner | DITPR ID | System Name | System Acronym | Transition State | Certification Requested CS ($M) | Certification Requested DM ($M) | Certification Approved CS ($M) | Certification Approved DM ($M) | Certification Approved Total ($M) | Certification Conditions | Business Function |
